

Michele Prestowitz – Project Director of Restoration

Michele Prestowitz is a Project Director of Restoration. She holds her B.A. in Political Science and Biology as well as her Masters in Public Health and Public Policy. Michele started out with TRWC in 2010 working on our fundraising efforts. In 2015, she transitioned to managing restoration projects through their many phases. She additionally coordinates Truckee River Day and the Donner Lake Interagency Partnership for Stewardship (DIPS). Michele values that our work builds on the stewardship ethic in our community and is making our watershed more adaptable and resilient to current and future threats like climate change. Outside of work you can find Michele skiing in the winter, mountain biking in the summer, and reading a great book year-round!
