

Sue Drake - Development Director

Sue holds her B.A. in Biology from the University of Montana. After serving as a volunteer on TRWC's Sustainable Funding team, Sue joined the TRWC team in 2019 as our Development Director. Prior to the Watershed Council, she worked as the Children's Program Manager at Northstar Ski Resort for over 13 years. After living in multiple cities around the western U.S. where rivers are a central part of the culture, Sue was drawn to the Watershed Council for its mission of bringing the community together around the Truckee River. Her background in biology has allowed her to help donors and volunteers gain a deeper understanding of restoration and the benefit it brings in combatting climate change. Outside of work you can find Sue reading, trail running, and skiing!
