

## Tiffanee Hutton - Project Director of Restoration

Tiffanee holds a B.S. in Marine Biology from Eckerd College and a M.S. in Watershed Science and Policy from California State University, Monterey Bay and has been working for over a decade in fisheries management, aquatic ecology, and habitat restoration for state and federal agencies, private consulting, and conservation non-profits. She has worked on a diverse suite of projects throughout California and the Intermountain West aimed at restoring ecological function at the landscape scale. She is thrilled to be leading projects for TRWC with a commitment to improve climate resiliency and watershed function. Outside of work, her interests center around activities that allow her to be outdoors, including fly fishing, rafting, mountain biking, and skiing.
