

**Boca Forest Health
Registered Professional Forester Consultation and Oversight**

Response to Comments

April 10, 2026

Q: Will the TRWC allow a portion of the oversight work to be conducted by an Assistant Forester under Registered Professional Supervision?

A: Yes, the expectation would be that some of the oversight tasks could likely be completed by Assistant Forester, however RPF will need to be the primary contact and assume main responsibility for the work tasks including communication, documentation/approval of any inspections taking place and ensuring that contractor is adhering to all USFS requirements and regulations.

Q: Can TRWC provide the shapefiles for this project?

A: Shapefiles are included with this Addendum. Use [this link](#) to upload the zip file.

Q: Is it anticipated that implementation work will be awarded to multiple contractors of a single contractor?

A: We hope to be able to secure a single contractor for the implementation component of this project. Projects of similar size within the MTRW Partnership have been successful in securing a single contractor to take on the required work tasks.
